## • PROFILE •

Accomplished Senior Software Developer with over 7 years of experience in crafting robust SaaS platforms and financial solutions. Expertise in Laravel, API integrations, and AWS CI/CD pipelines enables the delivery of scalable architectures that enhance performance and reduce costs. Proven ability to improve job runtimes significantly while maintaining a strong focus on clean, maintainable code. A collaborative team player with a passion for driving innovation and efficiency in software development. Ready to tackle complex challenges in a senior engineering role.

## • EMPLOYMENT HISTORY •

### Senior Software Developer at Castos, USA - Remote

Sept 2025 — Present

- Provide ongoing back-end support for Laravel-based applications, ensuring production stability and optimal performance.
- Enhance existing features and implement new functionalities to improve user experience and system efficiency.
- Collaborate with cross-functional teams to address technical challenges and streamline development processes.

### Full Stack Developer at Findymail, France - Remote

Oct 2025 — Nov 2025

- Worked on back-end features in a fast-paced SaaS environment using PHP/Laravel.
- Improved core functionality (enrichment flows, email verification, job processing), contributed to code quality through reviews and refactoring, and helped stabilize API-driven workflows.
- Gained strong experience working within a mature engineering process with high expectations for structure, clarity, and maintainability.

### Senior Software Developer at Super Solutions Limited, UK - Remote

Oct 2024 — Oct 2025

- Led development of SuperCore, a modular asset/forex service with caching and historical pricing.
- Migrated platform stack: Laravel 11 -> 12, Filament 3 -> 4, Tailwind 3 -> 4, cutting technical debt.
- Designed multi-tenant architecture with client/portfolio separation and advanced permissions.
- Integrated external APIs (Plaid, TwelveData, Alpha Vantage) into asset workflows.
- Improved Redis/Horizon job performance, reducing runtime

### Full Stack Developer at Userdoc, Melbourn - Remote

Jun 2024 — Oct 2024

- Developed new features for an AI-powered software requirements platform using Laravel + React.
- Enhanced API integration and front-end workflows.

• **Senior Software Developer at Castos, USA - Remote**

Jan 2018 — Mar 2024

- Built podcast ad-serving backend (payout automation + analytics) 'boosted recurring revenue.
- Launched AI transcription service, improving retention for new users.
- Partnered on real-time recording features, improving podcasting experience.
- Hands-on with Laravel, Livewire, React, Alpine.js, AWS, Cloudflare Workers.

• **Early Experiences 2011-2017, Podgorica**

2011 — 2017

Ops Calendar, Codeus, Moken, SoftyWare, Crnogorski Telekom

- Worked across Laravel, Vue.js, and telecom engineering roles.
- Contributed to cryptocurrency apps, SaaS modules, and fiber-network design projects.

 **EDUCATION**

• **Bachelor Degree, University of Montenegro Faculty of Electrical Engineering, Podgorica**

**B.Sc. in Electrical Engineering** — University of Montenegro

Graduated with High Honors. Thesis: *Fiber Wireless Access Networks*.
